## Pricing

List Price is per unit. All prices exclude GST.

If you are requiring an item that you do not see listed in this booklet, please contact our customer service team on 1800 810 803.

## Terms and Conditions

No party should rely upon the contents of this publication as to the fitness of any particular product for any particular use or application. Goods are offered with the benefit of the manufacturers Warranty. Reliance Worldwide Corporation (AUST.) Pty Ltd. shall not be liable for any loss or damage either direct or consequential arising from any defect.

RWC reserves the right to modify designs and specifications and to withdraw and introduce products at any time without notice.

No part of this publication may be reproduced, copied or transmitted in any form by any means graphic, electronic or mechanical (including photo-copying, recording, taping or by any information storage and retrieval system) without prior permission in writing of the publisher Reliance Worldwide Corporation (Aust.) Pty. Ltd.

## Installation

Installation is subject to the requirements of the applicable regulatory authority, the National Construction Code Volume Three – Plumbing Code of Australia, associated reference standards as applicable at the time and AS/NZS 3500.

## Reliance Worldwide Corporation Warranty

Reliance Worldwide Corporation (Aust.) Pty. Ltd. (RWC) will either replace or repair any defective goods where the defect arose as a result of manufacture for up to twenty-five (25) years for WaterMarked products, and one (1) year for non-WaterMarked products (see [www.rmc.com.au/warranty](http://www.rmc.com.au/warranty) for more details). You may contact RWC at the phone number, address or e-mail shown below and will be required to return the goods for evaluation. Should the defect be found to be one of our manufacture we will send you a replacement product to your stated address at our expense. Our goods come with guarantees that cannot be excluded under Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and failure does not amount to a major failure.

## About John Guest

When Mr. John Guest first opened his factory doors in the UK in 1961, he was determined to run a company where quality of product and excellence of service underpinned its ethos.

A strong spirit of innovation was encouraged from the outset, which led to the development and invention of the first Speedfit push-to-connect fittings in the 1970's by John Guest himself.

Today, John Guest has a long established reputation as a world leading manufacturer of push-to-connect fittings, tubing and other fluid control products. A reputation built on producing consistently high quality products with an ongoing commitment to value engineering and product development.

The world's first food-quality push-to-connect fitting, the John Guest range is now over 800 items strong and provides the quickest and most effective of installations. Pushing the tube into the fitting is all that is needed to produce an instant but permanent leakproof connection.

## Quality Manufacture

### A commitment to quality is at the heart of the John Guest philosophy.

The strictest control is maintained by virtue of the fact that design and manufacture is carried out in modern purpose built manufacturing centres in West London and at Maidenhead in Berkshire.

Maintaining control over the whole process from initial tool design and tool making, through to final assembly and testing, ensuring that only products of the highest quality are produced.

The company believe it is this commitment to quality that has led to it receiving prestigious awards from many of the world's leading testing and approvals organisations.

John Guest is a preferred supplier to many international companies.

**Fast Installation Time**  
**'Right First Time Every Time'**

**Quick Disconnection**

**Suitable For Soft**  
**Metal or Plastic Tubes**

**Re-Usable**

**No Tools Needed**

**Superior Flow Characteristics**

## WaterMark Details for Australian Product

The WaterMark license has been applied to the John Guest Speedfit Twist and Lock Range - see the relevant chapter of the John Guest Technical Manual for a full list of WaterMarked products.

All John Guest products should be installed as per the installation instructions and within the prescribed operation conditions as detailed in the appropriate technical manual section. Failure to ensure proper installation methods and operating conditions may result in a shortened operating life and or voiding of the product warranty.

## Non-Watermarked Product Tested to AS/NZS 4020

All John Guest potable water products are certified to AS/NZS 4020 for use in contact with potable water. Products that have not been certified to Australian standards through the WaterMark scheme are not suitable for installation within a plumbing system covered as AS/NZS 3500. All John Guest products that do not have a WaterMark approval are to be used in a serviceable location and must not be used in behind-the-wall applications.

The only exception to this is where a John Guest product is utilised as a sub-component in another manufacturer's product that carries an appropriate WaterMark certification.

All John Guest products should be installed as per the installation instructions and within the prescribed operation conditions as detailed in the appropriate technical manual section. Failure to ensure proper installation methods and operating conditions may result in a shortened operating life and or voiding of the product warranty.

Installations may be subject to the requirements of the applicable regulatory authority, the National Construction Code Volume Three – Plumbing Code of Australia, associated reference standards as applicable at the time and AS/NZS 3500.

## International Standards

Accepted by almost all the world's beer and beverage producers and by the manufacturers of drinks dispense equipment, John Guest products have quality and performance approvals from leading testing and acceptance authorities.

Speedfit products are designed and manufactured under a fully integrated system assessed by B.S.I to BS EN ISO9001. They are approved by IAPMO Oceana for hot and cold water use (ISO15875/21003).
